## Mighty Capability. Agile Package.

- › Powerful Kubota Liquid-Cooled EFI Engine. A more powerful 2-cylinder engine provides increased horsepower, with quiet and reliable muscle for most jobs. Kubota built, the durable engine is liquid-cooled to ensure consistent performance throughout the day. Electronic Fuel Injection (EFI) makes starting the engine in cold-weather easier, and provides instant power with greater throttle control
- › Capable Towing Capacity. The reliable engine delivers capable towing capacity, made simple with a standard trailer hitch for greater versatility and an ability to attach trailers or pull-behind equipment. For those who refuse to compromise, the mighty RTV520 can tackle even the toughest jobs with its 1,168 lbs towing capacity
- › Comfortable Seat Design. The stylish matte-black and contoured seats have been redesigned to provide better comfort during long rides
- › Narrow Stance. The RTV520's compact dimensions let you nimbly maneuver into and out of tight spaces with ease
- › Tight Turning Radius. With a tight turning diameter of just 21.7 ft., the RTV520 can work in narrow sites where bigger utility vehicles can't go
- › Metal Cargo Bed. The RTV520 features a durable metal cargo bed
- › Radiator with Screen. The new radiator which features a screen to maximize protection of the radiator. A window provides superior accessibility for cleaning and maintenance

SIDEKICK

## SIDEKICK

*Shown with optional accessories*

### The gas-powered, large chassis Sidekick is where Durability Meets Speed

- › The Sidekick is built upon the robust, heavy-duty platform to provide proven durability and performance
- › Electronic Fuel Injection (EFI) and a powerful 54 HP gasoline, water-cooled engine provide plenty of torque, astonishingly quick acceleration, and high transport speed (up to 40 mph)
- › Idle Speed Control (ISC) ensures stable power
- › The Continuously Variable Transmission with centrifugal clutch (CVT-Plus) provides fast acceleration, smooth operation, and controlled braking with engine-assisted deceleration
- › The cogged belt on the CVT-Plus is kept tight for minimal slippage and excellent durability, fully shielded to help keep out dust and water, and cooled with a large fan for even greater longevity
- › Light at low speeds and firm at high speeds, the Sidekick's speed-sensitive 45A Electronic Power Steering (EPS) is standard on all models and offers exceptional steering control, handling and stability
- › EPS helps to ensure outstanding performance even when the cabin/cargo box is heavily loaded or the snow blade is attached — operating at higher speeds, EPS safeguards against over-steering, increasing stability and control
- › Even when fully loaded, the Sidekick won't bottom out — front and rear adjustable independent suspension delivers a smooth ride with plenty of clearance
- › The aggressive style is offered in five your distinct colors, including the Special Edition Black Model, which comes with alloy wheels, spray-on bed liner, and visually distinct design and graphics to signify being "ready for anything"

**Whether you're hauling half a ton of cargo on the job site or feeding livestock out in the pastures, the smooth-riding, hard-charging RTV-X gets it done.**

- › VHT-X (Variable Hydraulic Transmission)  
- Kubota's VHT-X provides exceptional performance on various terrain with smooth and powerful acceleration. Low-speed driving is made exceptional through smooth throttle control, great traction and maneuverability with or without loads
- › Dynamic Brakes - One of the major benefits of the VHT-X transmission is the dynamic braking, which slows the vehicle down when you remove your foot from the throttle. It also provides drivers a sense of confidence as they travel down slopes. The ability to utilize one pedal operation creates a great experience, for both novice and experienced drivers alike providing a heightened sense of security
- › Towing Capacity - Standard two-inch hitch receivers are located at the front and back. The back receiver lets you tow up to 1,300 lbs.\* of gear. (\*See owner's manual for detail.)
- › VHT-X (Variable Hydraulic Transmission)  
- Kubota's VHT-X provides exceptional performance on various terrain with smooth and powerful acceleration. Low-speed driving is made exceptional through smooth throttle control, great traction and maneuverability with or without loads
- › ProKonvert™ Cargo Bed Optional - When you have a job to get done, being able to easily load and unload the cargo bed is critical. The new bed design allows you to open from either side, or the rear - especially useful for easily loading items in the back of the bed

## The RTV-X1130 has the capability, power, and performance to get the job done.

- › Full Steel Frame/CV Joint Guards - The high-rigidity steel frame isolates the occupants from noise, vibrations, and harshness. With structural strength that few in the industry can match, this durable frame can take years of punishment from heavy loads and rough terrain\*. (\*See owner's manual for details)
- › VHT-X (Variable Hydraulic Transmission) - Kubota's VHT-X provides exceptional performance on various terrain with smooth and powerful acceleration. Low-speed driving is made exceptional through smooth throttle control, great traction and maneuverability with or without loads
- › Wet Disc Brakes - The RTV-X series uses multi-disc wet brakes which provide long brake life. You'll also feel more secure, especially when traveling down long inclines, knowing that dynamic braking is helping to provide additional braking power and greater driving control
- › Standard Prokonvert™ Cargo Bed - It's not enough to get you there and back. You need to get your stuff there and back, as well. This heavy-duty 6ft steel cargo bed can do that for you, carrying more than a half-ton (1212 lbs.) of tools, firewood, gear, supplies... whatever you need to haul from here to there and back again
- › Standard Hydraulic Dump Bed - Dump sand, gravel, turf, or just about anything you can think of, from the RTV-X1130's whopping, 26.1 cu. ft. capacity cargo bed. Cargo that could take significant physical strength and time to unload can now be dumped with little effort in mere seconds
